

We are the 'Pro' in Platform Protection

Land | Air | Naval | Military or Civil

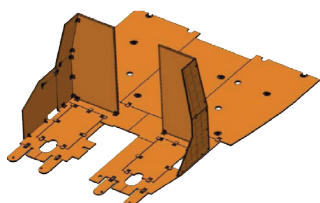

COMPOSITES SOLUTIONS

Customised solutions for your protection

Composites Solutions is one of the most technical advanced manufacturers of protection equipment in the world. The company was founded in 2010 and offers with its team more than 25 years of experience in the ballistic sector. We are experts in the technical development, sales and marketing. We invest all our experience to always develop the best product for our customers.

We design, manufacture and integrate platform protection systems for air, land and sea.

- ✓ Add-on Armor Kits
- ✓ Spall Liners
- ✓ Modular Kits
- ✓ Ballistic Blankets

Protection for Land Systems

We utilize extensive experience to manufacture highly advanced armor kits for civil as well as military vehicle platforms. Due to a growing worldwide demand, we have continuously developed new armor kit designs for various civil and military vehicle platforms to respond to our customers' requirements. Our armor kits are designed and manufactured according to STANAG 4569, EN 1063, MIL 662-F, STANAG 2920 and NIJ 0108.01. Our armor kits can be provided as applique armor, spall liner, special floor blast systems and seat armor designs.

Protection for Airborne Systems

We have designed multiple lightweight armoring solutions for Utility and Cargo helicopters in recent years. We are constantly redefining our helicopter armor kits to ensure we provide our customers the lightest possible design for the given threat level. Our lightweight armor kits combined with required aero-grade attachment systems outperform today's requirements in regard to weight, space savings and protection. We cooperate closely with our customers to ensure that the design, development, manufacturing and integration of the armor kits fulfill all requirements.

Protection for Naval Systems

With our experience and track record in the maritime armoring segment, we are able to provide tailored solutions for Patrol Boats, Interceptor Boats, Naval Vessels and high-end Luxury Yachts. We provide highly advanced solutions for armoring existing or new maritime platforms, taking into consideration the given ballistic testing criteria, weight requirements as well as the characteristics of the structure materials used. We support our customers for maritime armoring designs in every step from the initial design, prototyping, installation, integration and life marine water testing.
